Identification Information

IMPORTANT

The primary sources of information for ordering replacement parts are the individual parts lists indicated below. To ensure accuracy, it is recommended that the pertinent parts sheets be referenced when ordering Stearns replacement parts. Also, for easy reading and use of this bulletin, part numbers are listed in numerical order.

Product Related Part Sheets

To fully understand and identify the proper replacement parts and their corresponding part numbers, use the parts sheets listed below. These sheets provide a diagram representing an exploded view of a standard unit, along with descriptions of the basic components. Refer to this information when identifying and ordering replacements parts.

	<p>360 Series The 360 Series Brake with IP-56 enclosure, and many options such as space heater, external manual release, and brake release indicator, is an obvious choice for Portal Crane applications. Designed with ease of maintenance in mind, it is magnet-body mounted for easy access to the friction disc. The brake air gap can be checked without removing the brake housing, using inspection holes provided in the housing. The conduit box is part of the mounting plate, so wiring is not disturbed when the brake housing is removed. Available in static torque of 60 lb-ft through 300 lb-ft., NEMA frame sizes 182TC through 444/445TC, and IEC frames 132C-160C and 132D-225D.</p>
	<p>320 Series Enclosed Brake The 320 Series Brake, typically used on small gear motors, is now available with additional mounting options and brake housings. Size 1.2 with static torque of 3 lb-in. is available with a mounting bolt circle of 2.5" or 2.62". Size 1.8 with static torque of 7 lb-in or 15 lb-in is available with a 2.125" bolt circle, a 3.5" bolt circle, and also a 3.5" bolt circle and a 2.5" register. Size 2.8 with static torque of 35 lb-in is available with a 3.5" bolt circle. All sizes can be ordered with a steel brake housing. This series may also be used to replace our Solenoid-Actuated Brake Series 001 and 103. Other torque ratings are available, contact us with your requirements!!</p>
	<p>321 Series Totally-Enclosed Non-Ventilated (TENV) Commercial Duty Brake Available in the same sizes as the 320 Series Brake (Static torque of 3 - 50 lb-in), the 321 Series is the totally enclosed version of this brake. Sizes 1.2 and 1.8 offer two different mounting options, an internal or external mount. All sizes can be ordered with the same options as the 320 Series brake, including a maintained manual release and Double D friction disc. A completely gasketed, IP54 Enclosure version is also available.</p>
	<p>Series 333 European Style Brake with NEMA C-face mounting This direct-acting brake which is a drop-in for European brands such as Binder, Lenze, and Kebco, can also be supplied with adapters to mount to NEMA C-face motors. The frame sizes available range from 48C through 405TC/TSC/UC/USC. Static torque ratings are 3 lb-ft through 300 lb-ft, and are supplied with a torque adjusting ring as standard so torque can be set to your requirement. Brake housings can also be supplied, and when ordered with an internal manual release, or without manual release, enclosure is rated IP-56. Note: For an IP-56 brake rated 110 through 300 lb-ft., see Series 350 or 360.</p>
	<p>87,300 Series Division 1 Hazardous Location Brake, Nema 4/IP55 Enclosure Stearns is the first to offer a Division 1 Hazardous location brake in a Nema 4/IP55 Enclosure. It is the same basic brake as our 87,300-00 Series, offering the same sizes and same mounting, but sealed to protect against moisture.</p>
	<p>65,300 Series Division 1, Hazardous Location brake, with an optional NEMA 4 enclosure rating. Stearns now offers a Division 1 brake that can be mounted on motor fan guards. It also has an optional NEMA 4 enclosure rating, in the same dimensional package, for additional moisture protection.</p>

	<p>56,700 Series (1-056-7X3) The 56,7X3 Series is a foot mounted, bearing-supported thru-shaft brake. It includes all of the design feature of the 56,700 Series brakes, plus the flexibility of the foot mount and additional bearing-supported output shaft. This brake can also be used to replace our 55,200 Series foot mounted brake.</p>
	<p>Series 310 and Series 311 Delivers high torque in a compact package for servo and stepper motor applications featuring:</p> <ul style="list-style-type: none"> • Sizes ranging from 8 to 350 lb-in, (.9 to 39.5 Nm) of torque. • Splined hub and friction disc for high performance and minimal backlash. • Encapsulated coil and Class H insulation system for high ambient operating temperatures. • Series 311 offers larger hub bore diameters than the standard 310 Series.
	<p>Electronic Brake Release Indicator Indicates when the brake is released by sensing the change in the brake coil current waveform. For use with the Series 333/350/360 Brakes.</p>
	<p>AC Rectifiers for use with Armature Actuated Brakes A full line of AC rectifiers including Full-Wave, Half-Wave and a combination Full and Half-Wave rectifier, in a range of voltages from 115 Vac through 575 Vac. To reduce brake response time, we also offer Quick-set and Quick-set/Quick-release rectifiers, and our "Tor-Ac" version which provides coil turn off nearly as fast as DC side switching.</p>
